EXPLANATORY NOTES

1. In all the tables of imports and exports in this report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Refrigerators and parts" and "Locomotives and parts", etc., etc., which show both quantities and values. In the item "Refrigerators and parts" the quantity represents the number of "Complete refrigerators" only, while the value represents not only the value of the specified number of complete refrigerators but also the value of all kinds of "Parts" of refrigerators; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. *Imports: Valuation.*—"Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. Under the main provisions of the law, the value of merchandise imported into Canada is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to Canada; but the value shall not be less than the price to jobbers and wholesalers generally, nor less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (See Sections 35 to 45 of the Customs Act.)

7. For Customs entry purposes, the value in the currency of the country of export is converted to Canadian currency at exchange ratios as authorized by law and Orders in Council. (See Section 55 of the Customs Act and Orders-in-Council respecting currency valuations.)

8. *Canadian Exports: Valuation.*—"Canadian Produce" exported includes Canadian products or manufactures, also exports of commodities of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined in Canada from imported raw sugar, flour ground from imported wheat, and articles constructed or manufactured from imported materials.

9. The value of exports of Canadian merchandise is the actual cost or the value at the time of exportation at the points in Canada whence consigned for export.

10. *Foreign Exports: Valuation.*—"Foreign Produce" exported consists of foreign merchandise which had been imported "entered for consumption". The value of such commodities is the actual cost.

11. *Countries to Which Trade is Credited.*—Imports are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, save in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

12. Exports are credited to the country of final destination, *i.e.*, the country to which they are consigned, whether that country possesses a seaboard or not. The country of final destination is the country to which goods exported from Canada are intended to pass, without interruption of transit, save in the course of transshipment or transfer from one means of conveyance to another.

13. *Ports.*—The Table of the Trade of Canada, by Ports and Provinces, shows that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for home consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

14. The initials "N.O.P." means "not otherwise provided for".

15. Since June 1, 1931, the value of Canada's domestic exports of Gold Bullion represents the monthly average current market price of gold and not the legal Mint par of \$20.67 per fine ounce.

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation) subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, récipients, etc., n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression «ton» signifie 2,000 livres et «qtx» (ou quintal) 100 livres avoirdupois. Lorsque l'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

4. Dans ce rapport on trouve des item comme «glacières et leurs parties» et «locomotives et leurs parties», etc., etc., montrant les quantités et les valeurs. Dans le cas de «glacières et leurs parties» la quantité représente le nombre de «glacières complètes» seulement, et la valeur représente non seulement celle des glacières complètes mais aussi celle de toutes les «parties» ou pièces détachées de glacière; c'est pourquoi, dans cet item et autres semblables, il est impossible d'établir la valeur moyenne par unité.

5. *Importations: Evaluation.*—«Importations» signifie «importations entrées pour la consommation». «Entrées pour la consommation» n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie impossible de ces marchandises.

6. Dans l'esprit de la loi, la valeur des marchandises importées au Canada est leur valeur raisonnable au prix courant là où elles sont vendues pour la consommation locale sur les principaux marchés du pays d'où, à la même époque, elles sont expédiées directement au Canada; mais la valeur ne doit pas être inférieure au prix coté généralement aux marchands de gros, ni inférieure au coût actuel de production à la date de l'expédition, plus une marge raisonnable pour frais de vente et profits. (Voir articles 35 à 45 de la loi des douanes.)

7. Pour les entrées des Douanes, la valeur en numéraire du pays d'exportation est convertie en numéraire canadien au taux du change autorisé par la loi et par Ordres-en-Conseil. (Voir article 55 de la loi des douanes et Ordres-en-Conseil sur l'évaluation des devises étrangères.)

8. *Exportations: Evaluation.*—L'expression «produits canadiens» couvre non seulement les produits du sol ou des manufactures du Canada mais aussi les produits d'origine étrangère qui ont été modifiés dans leur forme ou augmentés de valeur par l'industrie canadienne, comme le sucre raffiné au Canada après y avoir été importé brut, la farine extraite de blé importé et les articles construits ou fabriqués avec des matériaux importés.

9. La valeur des produits canadiens exportés est leur valeur actuelle, au moment de leur exportation, aux points du Canada d'où ils sont consignés pour exportation.

10. *Réexportations: Evaluation.*—Les «produits étrangers» exportés englobent toutes les marchandises réexportées par le Canada, après avoir été importées «entrées pour la consommation». La valeur de ces produits étrangers est le coût effectif de ces marchandises.

11. *Pays auxquels le commerce est attribué.*—Les importations sont attribuées aux pays d'où elles ont été consignées au Canada. Les pays de consignment sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inévitables. Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignment. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent telles importations comme venant du Royaume-Uni.

12. Les exportations sont attribuées au pays de l'ultime destination, c'est-à-dire le pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays d'ultime destination est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inévitables.

13. *Ports.*—Le tableau du commerce du Canada, par ports et provinces, montre les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation de la province où est situé le port, ou que les marchandises exportées sont produites par la province où est situé le port de sortie.

14. Les initiales «n.a.é.» signifient «non autrement énuméré».

15. Depuis le 1^{er} juin 1931, les exportations d'or de provenance domestique sont évaluées au cours moyen de chaque mois et non pas au pair libératoire de la Monnaie de \$20.67 l'once de métal fin.

MONETARY AND NON-MONETARY GOLD IN TRADE STATISTICS

16. The Bureau of Statistics has experienced difficulty in recent years in connection with the treatment of gold in trade statistics, especially in the case of exports. In former times there was some movement of gold from Canada in the form of gold-bearing quartz, dust, nuggets, and bullion obtained direct from mining operations to the United States for refining purposes. These exports were recorded as merchandise. When the Royal Mint began refining gold in Ottawa, this gold-bearing quartz, dust, nuggets, etc., began to be exported in the form of gold bullion, and was recorded under the "Coin and Bullion" section.

The Bureau has been in conference with the Bank of Canada, and the Department of National Revenue, and has developed a policy whereby all gold bullion which goes out of the country as "Merchandise" will be entered as such, and will be recorded in total commodity exports. In consequence of this arrangement, Canada's exports and total trade have been revised from 1926 to date.

OR MONÉTAIRE ET NON MONÉTAIRE DANS LES STATISTIQUES DU COMMERCE

16. Le Bureau Fédéral de la Statistique a éprouvé certaines difficultés en ces dernières années dans la manière de considérer l'or dans les statistiques du commerce, spécialement dans le cas des exportations. Autrefois le Canada exportait de l'or sous forme de quartz aurifère, poussière, pépites et lingots, provenant directement des opérations minières et expédié aux États-Unis pour affinage. Ces exportations étaient entrées comme de la marchandise. Quand la Monnaie Royale commença l'affinage de l'or à Ottawa, ces quartz aurifères, poussière, pépites, etc., furent exportés sous forme de bullion et furent entrés dans la section de "Monnaie et Bullion."

Après une conférence avec la Banque du Canada et le Ministère du Revenu National, le Bureau a convenu d'entrer tout l'or sortant du pays comme "marchandise" sous tel en-tête, et de le faire entrer dans le total des exportations de marchandises. Comme conséquence de cet arrangement, les chiffres des exportations et du commerce global ont été révisés depuis 1926 jusqu'à ce jour.
